PROJECTS

MMDB — HTML, CSS, jQuery, Javascript, Bootstrap

Mike's Movie Database is a front-end only project. It allows a user to search and catalogue movies to be sorted and stored for reference later on. The movies are stored in localStorage for persistence.

MMDB v2.0 — Ionic Framework, Angular.JS, MongoDB, Node.JS, Express.JS

Mike's Movie Database version 2.0 is an Ionic Framework application. It also is a tool for searching and cataloguing movies, as well as finding streaming sources for movies and television shows. It is built with Ionic so that it can be run on an iOS or Android device and the users are stored in a MongoDB Database for persistence and authorization.

rollCall — jQuery, Node.JS, Express.JS, PostgreSQL, Bootstrap

rollCall is a school ticket management system designed for school dances and events. It allows student IDs to be scanned for selling and redeeming tickets, as well as CSV's of students to be imported at the start of a semester. Used jQuery to allow for as few page refreshes as possible to make the product as efficient as possible.

PirateRunner — PhoneGap, Phaser.js, HTML, CSS

PirateRunner is a mobile endless-runner game, where a skeleton Pirate tries to collect as many coins as possible, while avoiding running in to crates that are randomly generated. The game is built with Phaser as the game engine, and PhoneGap to run on iOS or Android.

EXPERIENCE

Service Software, LLC - Support Technician

- Regularly used Microsoft SQL Server to solve client support issues.

Best Buy - Geek Squad Agent/Customer Service

Littleton, Colorado

June 2015 - December 2015

Centennial, Colorado

August 2008 - June 2015

EDUCATION

Galvanize Full-Stack Immersive

- Immersive Web Development program learning Javascript, including MongoDB, Express.JS, Angular.JS, and Node.JS.

Denver, Colorado

January 2016 - June 2016

University of Northern Colorado — B.A. Criminal Justice

- 3.6 cumulative GPA

Greeley, Colorado

August 2010 - December 2013

SKILLS
