PROJECTS

DishAnywhere.com — *HTML, CSS, React.JS, CoffeeScript, Node.JS*

DishAnywhere.com is an online video site that allows you to instantly watch thousands of TV shows, movies, and clips on your computer. DISH customers can log in to unlock even more content from the networks they subscribe to at home, including HBO, Starz, TNT, and more.

MMDB — *HTML, CSS, jQuery, Javascript, Bootstrap*

Mike's Movie Database is a front-end only project. It allows a user to search and catalogue movies to be sorted and stored for reference later on. The movies are stored in localStorage for persistence.

MMDB v2.0 — *Ionic Framework, Angular.JS, MongoDB, Node.JS, Express.JS*

Mike's Movie Database version 2.0 is an Ionic Framework application. It also is a tool for searching and cataloguing movies, as well as finding streaming sources for movies and television shows. It is built with Ionic so that it can be run on an iOS or Android device and the users are stored in a MongoDB Database for persistence and authorization.

rollCall — *jQuery, Node.JS, Express.JS, PostgreSQL, Bootstrap*

rollCall is a school ticket management system designed for school dances and events. It allows student IDs to be scanned for selling and redeeming tickets, as well as CSV's of students to be imported at the start of a semester. Used jQuery to allow for as few page refreshes as possible to make the product as efficient as possible.

EXPERIENCE

EchoStar Corporation/Dish Network - *Full Stack Developer*

Superior, Colorado
July 2016 - Present

- Developed dishanywhere.com including converting Coffeescript components to React, maintaining existing components, and adding time-sensitive features such as Olympics coverage.

Service Software, LLC - *Support Technician*

Littleton, Colorado
June 2015 - December 2015
